Sliding table machine – for rapid and economical packaging

KOCH SLIDING TABLE MACHINE KST

Sliding table machine for sealing, forming or both.

The KST sliding table machine has been designed to enable rapid and economical packaging. Both for sealing and for forming – without any compromises in terms of quality.

The KOCH sliding table machine and its various versions:

The KST sliding table machine is comprised of a movable table on which the tool is mounted and, depending on the version, a fixed sealing station or a combined forming and sealing station. The machine is electro-pneumatically controlled.

The KST-S – for sealing. Manual table advance, the sealing temperature is electronically controlled.

The KST-S-V – for sealing. Pneumatic table advance, memory-programmable control, the operating panel is equipped with a plain text display.

The KST-FS-V – for sealing and/or blister forming. Pneumatic table advance, memory-programmable control, the operating panel is equipped with a plain text display.

Advantages of this machine technology

- Low capital investment costs
- Low-cost format parts and quick format change resulting in very short setup times
- Very flexible in use
- Small space requirement and low energy costs
- Extremely simple operation
- Easy to service due to modular build-up and modern machine design

Max. sealing area
23-60: 230 x 600 mm

Tool height
50/70 mm

Max. blister depth
47/67 mm

Heating
23-60: 3.6 kW

Connected load
23-60: 3.8 kW

Electricity supply
3-phase 400 VAC, N, PE

Option
Movable chassis

Technical data

Machine versions:

- KST-S/23-60/50(70)
- KST-S-V/23-60/50(70)
- KST-FS-V/23-60/50(70)
